Artist's Statement:

My forte is photography and graphic design. I have been avidly into both of them since a young age. Even as a young person I was drawing posters to advertise products or drawing buildings. Photography naturally fell into my field of interests but was held back by a lack of equipment that was worthy of my desires. Still later with the advent of computers and the digital age my world was greatly enlarged. What I did by hand in restoring photographs now I could be much more exact in doing and with many new avenues to approach the task at hand. I have dabbled in drawing with pen and pencil and still do occasionally but my area of expertise is in photography, graphic design, photo-restoration, web-design and printed piece design: such as restaurant menus, business cards, flyers, posters and the like.

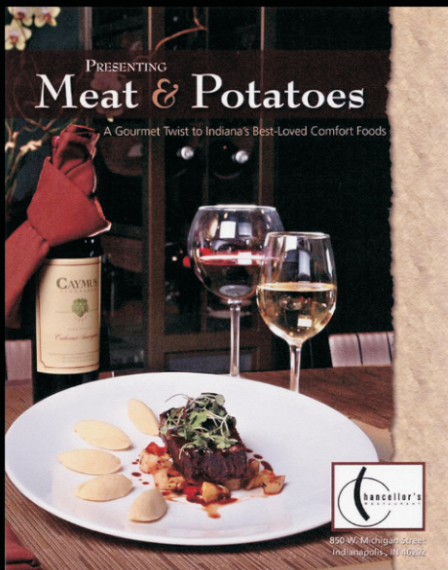

I am now totally digital in Photography and Graphic Design.

About the Artist

Born and Raised in Indiana but an old-time Westerner at heart. Most of my life has been spent in Indiana but relished my 10 yrs. in Tucson, Arizona. This is where my life as an artist truly began. Working in the commercial photography and criminal forensics I had many varied assignments from aerial to architectural to landscape, food and portrait photography. As well I covered local and national events such as gubernatorial and presidential events from an Arizona perspective.

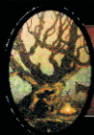

After coming back to Indiana I expanded into wedding, model and portrait photography. All along the way I was designing printed pieces for various needs and then I broke into restaurant menu design. This has developed into a good portion of my present business along with photographing various international foods and covering local politics with pictures. Presently I am involved with creating and maintaining websites for various Artists and businesses along with creating videos for the same.
